

# Put Your NetSuite Data to Work

Reporting & Insights That Improves Business Performance

ORACLE  
NETSUITE

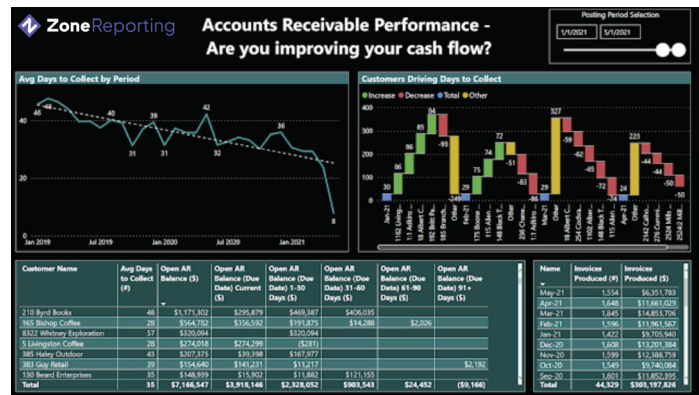

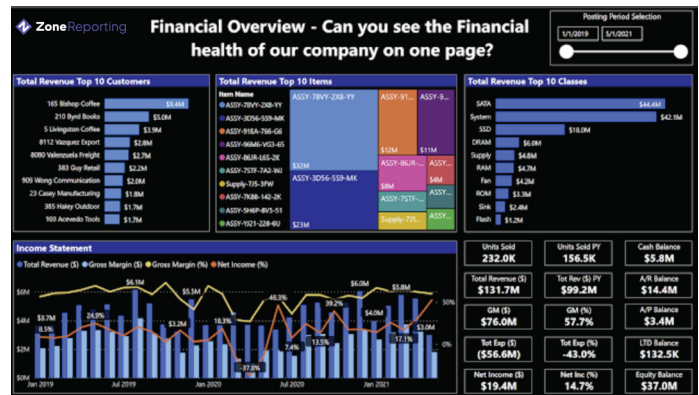

Power BI

ZoneReporting is the only Pre-Built Power BI reporting solution for NetSuite.

## Why ZoneReporting?

- ✔ NetSuite certified SuiteApp
- ✔ Microsoft certified App
- ✔ #1 Ranked BI tool by Gartner (Power BI)
- ✔ NetSuite's Data Model Replicated and Reconciled
- ✔ Implementation in less than 2 weeks
- ✔ Includes hands-on consultation and training
- ✔ Pre-built report collections that provide business insight on day 1 of being live with ZoneReporting
- ✔ Embed Power BI reports back into NetSuite Dashboards

# ZoneReporting Builds Value by Delivering Enterprise Efficiency

Our Pre-Built BI solution allows users to quickly focus on building reports that improve business performance and not consume time organizing the data. Empower your organization to drive better business decisions from NetSuite through benefits such as:

## Unlimited joins on all your NetSuite data

- ✓ See your business results end-to-end to get the full story of your performance

## Time and Money Savings

- ✓ Reduce/Eliminate Time Spent on Data-Warehousing Activities and Resources
- ✓ Reduce Time Spent Preparing Reports up to 100%
- ✓ Access to reports for individuals without NetSuite user licenses

## Data Back-Up by having a copy of all your NetSuite data

- ✓ Protect your business from any business interruption

## Single Enterprise-Wide Reporting Platform that joins data from all your data sources

- ✓ One Version of the Truth Reporting - all your data sources in one reporting tool (i.e. Salesforce, Google Analytics+ AdWords)
- ✓ All your Reporting Needs in one tool - financial, operational, month-end, mobile

## Pre-built Reports that provide significant and actionable business insight on Day 1

- ✓ Revenue and Margin Overview and Deep-Dive into Unit Economics Reports
- ✓ Financial Reporting Package
- ✓ Working Capital Reports
- ✓ Inventory/Supply-Chain Set of Detailed Reports
- ✓ Inventory Forecasting Model
- ✓ Cash-Flow Forecasting Model
- ✓ Sales Order Profitability Report
- ✓ SaaS Metrics Dashboard (for software companies)
- ✓ Plus more: Predictive Analytics/Machine Learning
- ✓ Ability to create your own reports to answer your toughest business questions
